

Diagnostic Testing

DNA Testing

Having a DNA test is the best way to find out exactly how your body responds to and metabolises certain nutrients.

More effective than a blood test, it will help to identify your personal micronutrient requirements. We can then create a bespoke drip based on your body's own unique nutritional needs.

1. Choose the test

2. Take 1 min swab

3. Receive detailed report

4. Book bespoke drip

Vitamin D Testing

Vitamin D deficiency is common in the UK and can go undetected. Get tested in our clinics now with an easy and accurate finger-prick blood test, with results in 15 minutes.
